

Intelligent Intake App

Interviews on mobile devices increase precision, disclosure & user satisfaction

The New School of Social Research, "...Automated Interviews on Smartphones...", June 2015

90% of full time American workers use their personal smartphones for work

BYOD Insights 2013: A Cisco Partner Network Study

30% of staff observed, but did not report, multiple incidents in the last year

Arbor Insight, "Workplace Incident Reporting via Apps", November 2017

More timely, actionable reporting from staff

More timely, actionable insights from more engaged staff is key to more efficient resolutions of concerns or incidents related to Ethics, Safety, Security and Compliance. Our tailored, expert-driven digitized interviews mean that you save time, effort and cost responding to, investigating and resolving a range of workplace concerns

Capabilities Overview

Experts & Machine Intelligence

Groups of experts in elicitation and investigation design the intake interviews, which are then combined with algorithms that utilize Machine Intelligence, a subset of AI, to create the guided interviews used in the app

Anonymity at Every Stage

Users can share concerns and respond to follow-up questions from dashboard coordinators while remaining anonymous

Tailored, Adaptable Interviews

The App guides users through expert-driven interviews tailored to specific issues and a mobile app experience in order to uncover critical context usable by investigators

Secure and Scalable

Hosted on our secure Amazon Web Service (AWS) single-tenant cloud that scales to suit the needs of your organization

Mobile & Desktop Reporting

Because app-based interactions are increasingly preferred by the digital workforce, reports or follow-ups can be made via the mobile app or desktop browser

Integrate with your CMS/IMS/PSIM

Integrate our intelligent app with your existing dashboard, fueling it with better data and increasing ROI by supporting more effective data-driven decisions

COMPLIANCELINE Intelligent Intake App

Intelligent Intake App & Case Management

Our intelligent mobile and desktop apps deliver tailored, adaptable and extensible interviews that help ensure your staff can easily share more actionable details on a wide range of concerns related to Ethics, Safety, Security and/or Compliance matters. An evolution beyond traditional hotlines, adopting IIA demonstrates your clear commitment to keeping pace with changes in the digital workplace and engaging the digital workforce using methods they prefer.

The Intelligent Intake App Solution

Mobile & Desktop Apps

- Our progressive web app can be installed on both iOS and Android phones
- Available via Firefox, Safari and Chrome browsers on your desktop or laptop
- Users text to download and install the app on their phones, where it operates like a native app

MyCM Case Management

- Integrated with ComplianceLine's MyCM Case Management software
- Enables efficient two-way communication with IIA users, even if they choose to remain anonymous
- Infographics help you sort and analyze trends by incident type, location and date range
